Integral Solutions for the CNG Industry.

SMC-1100/TST TEST BENCH

TECHNICAL INFORMATION

DEVELCO SMC-1100 / TST Electronic Head Test Bench

This equipment has been designed and developed to check the supplier's communications in the field and as emulator of all the functionalities of the DEVELCO measurement system.

Some actions that can be emulated are: excess flow, high pressure cut-off, emergency stop, programmed load, etc.

Main features

- Industrial construction with high quality materials.
- Measurements in mm: 425x315x130 (width, length, depth).
- Weight: 5,700 Kgr.
- Pulse generator with variable frequency, to emulate loads.
- RS-485 communication port for automation test.
- Presentation display with white backlight.
- Power supply 220 Vac / 50 HZ.
